AWORLD OF DIFFERENCE

Recognising and challenging stereotypes of visible difference

PRIMARY LESSON ONE

What does a 'baddie' from a film look like?

Think about the 'baddies' you've seen in films and on TV and draw a picture of one of them.

CLASS DISCUSSION

What does the word **stereotype** mean?

A **stereotype** is an idea about a particular group of people that is often untrue or unfair.

Today we're going to be talking about how **stereotypes** affect people who have a visible difference (a mark, scar or condition that affects how they look).

Causes of a visible difference:

- Skin conditions like eczema, acne, or vitiligo
- Burns
- Birthmarks
- Craniofacial conditions, affecting the growth and development of the skull and face
- Cleft lip/palate (a gap or split in the upper lip and/or roof of the mouth)
- Cancer

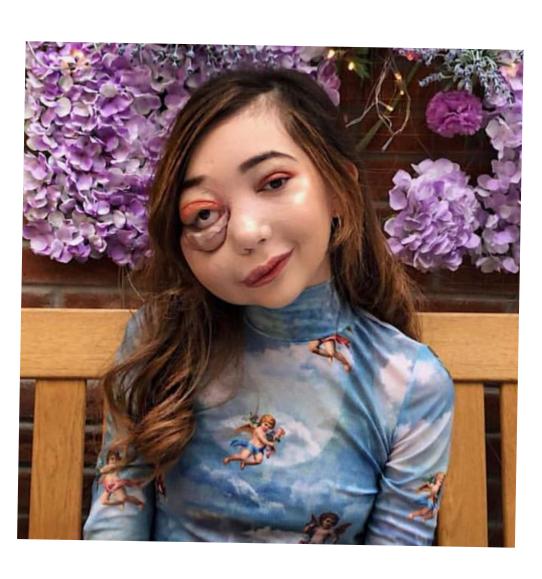

There are many types of visible difference

ACTIVITY

In your group, make a list of film or TV characters that have a scar, mark or condition that affects their appearance.

DISCUSSION

How might seeing stereotypes in films and on TV affect the feelings of people who have a visible difference?

Do you think seeing stereotypes makes people treat others differently, if they look different?

TIME TO REFLECT

What have you learned about **stereotypes**?
